

Investing in a conservatory is a big decision for your customers - that's why everything about it, from construction and material, to finish and security, has to be perfect. Whatever shape or size of conservatory your customers want, we can supply fabulous frames that look terrific and are fabricated to the highest standard.

We offer our conservatories in both S706 and Edge profiles with a full range of foiled and painted finishes. What's more, thanks to the REHAU system, customers can specify any combination of bi-fold, patio or French doors. Our Window Designer software means you can impress your customers with anything from a series of simple line drawings up to a stunning Photoshopped image of their home with the new conservatory in place. And to make your life easier, the software even provides all the detail you need to lay the base and specify the roof to millimetre-perfect accuracy.

## Gearing, Locking and Furniture

We've a wide range of gearing, locking and furniture options for every type of conservatory. Maco's locks have an unrivalled reputation for security and reliability. We carry a huge range of their products, from the basic espagnolette lock to their world-famous shootbolt locking system. We also fit stylish Fab 'n' Fix furniture on all our conservatories as standard.

## Conservatory Roofs

Thanks to our long-standing partnerships with several roofing specialists we can offer really competitive rates on both the K2 and Ultraframe systems. Just ask!

## Secured by Design

Our involvement in the commercial market has led us to develop a range of products that meet the gruelling Secured by Design standards, an initiative developed by the Police. With their toughened screws, thicker gauge steel and corner reinforcements, these super-sturdy frames really are significantly stronger than standard frames. They're tested to withstand thousands of Newtons of force, making them tough enough to make even the most persistent thief look for another target.
